

PRESS RELEASE

MD Aircraft, Wings Capital Management, and Blue Skies Aviation Sign Letter of Intent for 10 All-Electric MDA1 Aircraft to Advance Sustainable Aviation Across South Asia

Friedeburg, Germany – 6 July 2026

Wings Capital Management LLC (United Arab Emirates) and Blue Skies Aviation Solutions (Pvt) Ltd (Sri Lanka) have signed a pre-order agreement with MD Aircraft GmbH to secure production slots for ten all-electric MDA1 eViator™ aircraft, showing their commitment to introduce zero-emission regional air mobility across South Asia and the Asia-Pacific region. The agreement was signed in early July 2026 by representatives of all three organizations.

Advancing Sustainable Aviation Across South Asia and the Asia-Pacific

The agreement establishes Blue Skies Aviation as the operating partner responsible for deploying and maintaining the aircraft and ensuring carbon free operations for its existing customer base, and at the same time establishes Wings Capital Management as a go-to financing partner for South Asian operators looking to acquire and operate MD Aircrafts all electric eViator. Once certified, these first 10 aircraft are expected to enter service in Sri Lanka and the Maldives.

"This agreement underscores the growing international confidence in the MDA1 eViator and in MD Aircraft's vision for the future of zero-emission regional air mobility," said Gregor Müller, CEO of MD Aircraft. "We are proud to partner with Wings Capital Management and Blue Skies Aviation, whose expertise and regional presence will be instrumental in bringing sustainable, quiet, and highly efficient electric aviation to a market with a genuine, strong appetite for next-generation air mobility solutions."

"As technical and operational partner, we look forward to bringing the MDA1 into service across our region, supporting operations and maintenance to the highest international standards," adds Don Asitha Manage, Managing Director of Blue Skies Aviation.

"We believe the MDA-1 eViator represents a breakthrough in Advanced Air Mobility, combining state-of-the-art electric propulsion, zero in-flight carbon emissions, significantly reduced noise, and operational efficiency to redefine the future of regional aviation," says Nipuna Wahalathanthrige, Group CEO of Wings Capital Management. "This investment reflects our commitment to Environmental, Social and Governance principles while supporting the global transition toward clean, intelligent, and sustainable air transportation."

The collaboration underscores the growing demand for sustainable, technologically advanced regional aviation solutions capable of meeting the operational and environmental requirements of the future.

MD Aircraft GmbH

About MD Aircraft GmbH

MD Aircraft is a German aerospace company dedicated to developing zero emission, quiet, cost-efficient electric aircraft for Regional Air Mobility. MD Aircraft is part of the MD Group including MD Flugzeugbau and MD Composites Technologies GmbH which has over 30 years' experience designing, building, and certifying composite aircraft – a decade with electric propulsion. MD Aircraft's flagship program, *the MDA1 eViator*, will redefine regional air mobility with initial flight tests in early 2028, and commercial certification and entry into service targeted for 2030.

About Blue Skies Aviation Solutions (Pvt) Ltd

Blue Skies Aviation Solutions (Pvt) Ltd is a Sri Lanka-based aviation operator headquartered at Colombo International Airport, Ratmalana. The company provides operational and technical aviation services across the region and will act as an operating and maintenance partner for the MDA1 aircraft acquired under this agreement, supporting deployment across Sri Lanka and the Maldives.

About Wings Capital Management Consultancies

Wings Capital Management Consultancies (UAE) is a leading international investment consultancy and project development firm specializing in strategic investments across aviation, renewable energy, advanced technologies, infrastructure, and sustainable economic development. Through its global network of investors and technology partners, the firm facilitates transformative projects that create long-term value while supporting innovation, environmental stewardship, and regional economic growth.
